

Martin Global Investing

Martin Global Investing combines Martin Investment Management, LLC's strategies of "Best Ideas" and Tortue Capital™ to create a portfolio of 50 to 60 large capitalization equities of the U.S. and international developed markets. This strategy follows the similar investment philosophy and process of the firm's other strategies, focusing on buying quality companies at reasonable valuations and holding the investment over a long term investment horizon. Martin Global Investing seeks to invest in companies with consistent growth, strong fundamentals, low leverage, and high trading liquidity. This strategy is actively managed. Although the strategy limits position size to five percent of the portfolio, the strategy can be customized to reflect all market sectors and higher position limits.
