

Tortue Capital™

Martin Investment Management, LLC's international strategy, Tortue Capital™, invests in a range of non-U.S. companies in the developed world through a focused portfolio of approximately 25 to 30 large capitalization equities. The strategy of Tortue Capital™ is similar to our Growth with a Value Discipline and our Eco-Investing approaches, which invest in growing companies that demonstrate solid fundamentals, attractive valuations, and good management. Our strategies focus on the long-term to achieve a satisfactory return on investment and are actively managed with a low rate of portfolio turnover. In addition to individual company analysis, we identify broad regional themes and assess individual country fundamentals in the selection of holdings for Tortue Capital™. Although there are no emerging markets securities in the portfolio, it seeks to have exposure to the emerging markets through the products and services of the companies domiciled in the non-U.S. developed world. The ability to attract foreign investments and liquidity are also important.

Returns are calculated using gross returns. The returns in this presentation include the reinvestment of income. Dividends are accrued as of the ex-dividend date and interest is accrued monthly and in each case are accrued gross of non-reclaimable withholding taxes.

The MSCI EAFE (U.S. Dollar) Index, Net is an unmanaged, widely used index with no expenses, which covers industrial, utility, transportation and financial companies of 21 developed markets, excluding the U.S. and Canada. It is a capitalization-weighted index calculated on total return basis with dividends, net of withholding taxes, reinvested. This presentation uses the iShares MSCI EAFE ETF, which tracks the MSCI EAFE Index, as a proxy for the Index.
